Services :

- Provide the courses
- Customer Service
- Adminitrator

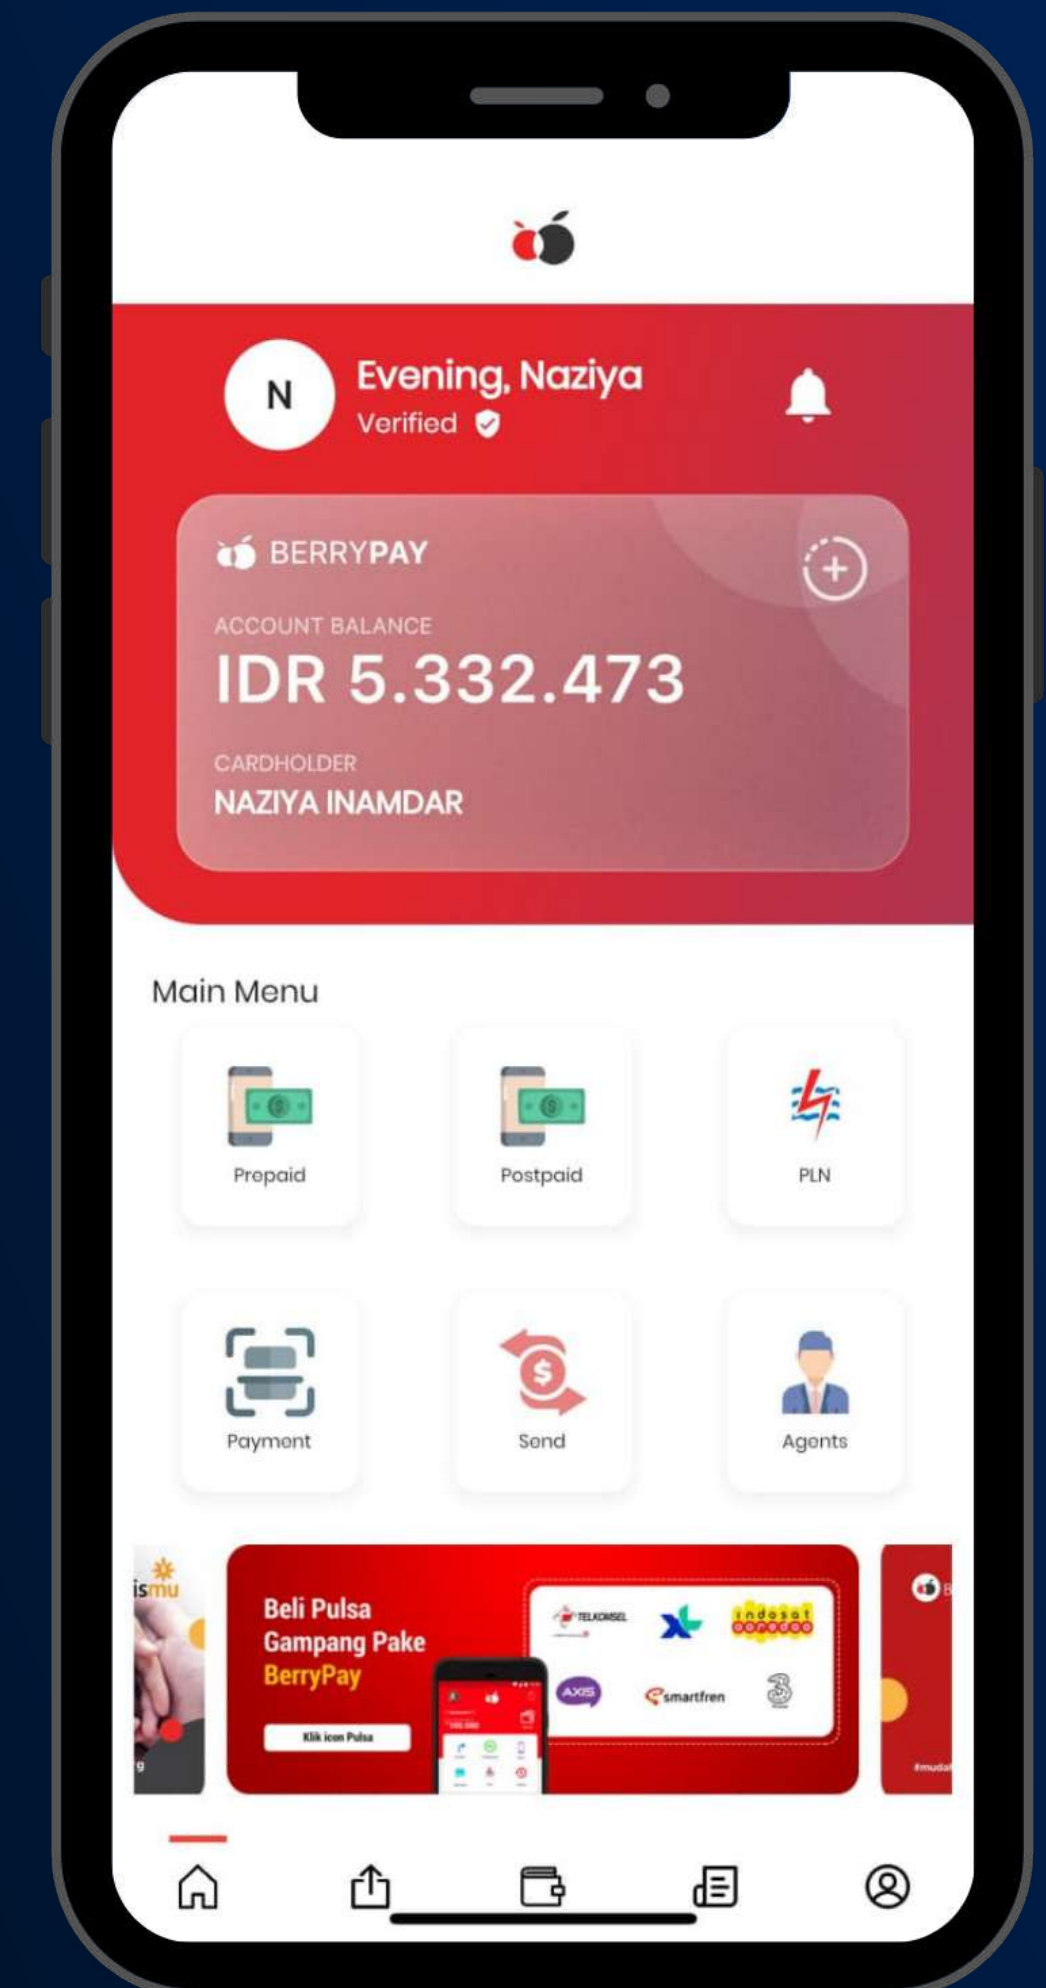

PROJECTS

BerryPay Wallet

Integrate Finnet Payment Gateway for PPOB and Remittance for Indonesia and Malaysia cross-border payment. BerryPay is one of most favourite remittance services for Indonesia worker in Malaysia to transfer money.

PROJECTS

Universitas Mercubuana - Finance and Accounting System (SubCont MX Global)

PROJECTS

Mercu Buana would like to automate their manual system to digital. Accounting software describes a type of application software that records and processes accounting transactions within functional modules such as assets, accounts payable, accounts receivable, journal, general ledger, payroll, and trial balance. It functions as an accounting information system.

The screenshot displays the MX GLOBAL Finance & Accounting system interface. On the left is a dark sidebar with a menu including: Chart Of Accounts, Ledger, Chart of Depreciations, Depreciation Area, Controlling Area Settings, Currencies Code, Currency Ratio, Currency Rates, Exchange Rate Types, Working Calendar, Fiscal Year Variant, Document Types (highlighted), Posting Key, Account Types, City & Region, and Country ID.

The main content area is titled "Finance & Accounting" and shows the "Document Types Table". It includes a "New Record" button and a search bar. The table lists document types with columns for ID, Document Type, Document Type Year, Document Type Description, Number Range (From/To), Running Number (Latest), Document Type Reverse, Created At, Updated At, and Action icons.

ID	DOCUMENT TYPE	DOCUMENT TYPE YEAR	DOCUMENT TYPE DESCRIPTION	NUMBER RANGE FROM	NUMBER RANGE TO	RUNNING NUMBER (LATEST)	DOCUMENT TYPE REVERSE	CREATED AT	UPDATED AT	ACTION
2	GA	2021	Accounting Document	1010000000	1019999999		GB	2021-03-17 03:06:01	2021-03-17 17:52:37	
3	GB	2021	Accounting Document Reversed	1020000000	1029999999			2021-03-17 17:52:11	2021-03-17 17:52:11	
4	VA	2021	Vendor Invoice	2010000000	2019999999		VD	2021-03-17 18:00:39	2021-03-17 18:01:27	
5	VD	2021	Vendor Reverse	2040000000	2049999999			2021-03-17 18:01:19	2021-03-17 18:01:19	
6	VB	2021	Vendor Credit Memo	2020000000	2029999999		VD	2021-03-17 18:02:06	2021-03-17 18:02:06	
7	VC	2021	Vendor Payment	2030000000	2039999999		VD	2021-03-17 18:02:38	2021-03-17 18:02:38	

Overlaid on the right is the "General Journal Header Data" form. It contains fields for: Company Code (dropdown), Ledger (dropdown with value "OL"), Document Type (dropdown with a list of options), Transaction Currency, Translation Rate, and Posting Date. The Document Type dropdown is open, showing the following options:

- GA - Accounting Document
- GB - Accounting Document Reversed
- VA - Vendor Invoice
- VD - Vendor Reverse
- VB - Vendor Credit Memo

Universitas Mercubuana - ERP

The integrated management of their main business processes and activities. This system integrates CRM, Human Resources, Procurement, Finance, Learning Management and also the Accreditation.

Bosch Warehouse Management System

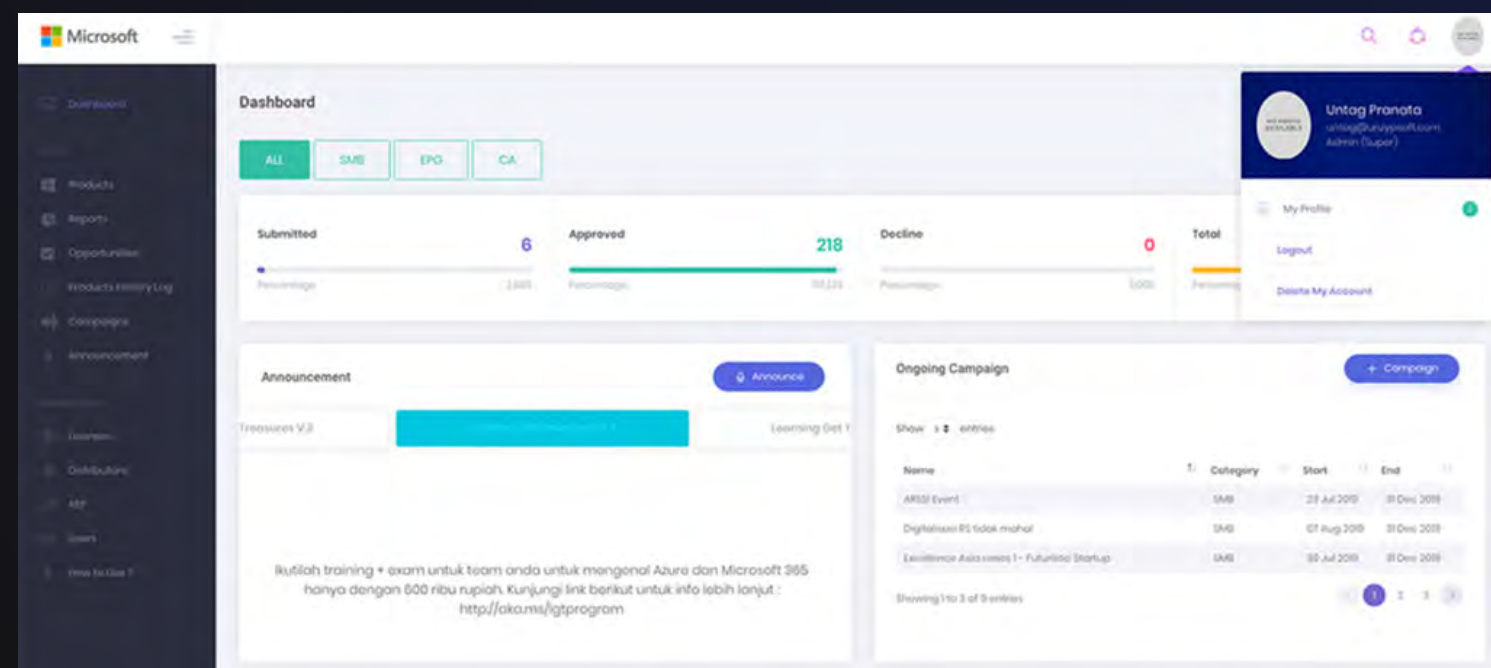

Bosch produces car ECU and distributes to car maker companies in Indonesia. This system tracks all warehouse operations from inbound, outbound, production, and report. Our desktop handle everything from inbound to outbound operations. And the web application handles all of the supply chain, invoices, raw material shipment, and management.

The screenshot shows a desktop application window titled 'BOSCH Warehouse Management System'. It features a menu bar with 'File', 'Inventory', 'Command', 'Settings', and 'Help'. Below the menu is a status bar with 'Good In Transit', 'Purchase Order to RSD', 'Production', 'Delivery Note to RSD', and 'Outbound to Customer'. The main area displays a table of invoices with columns: Invoice Number, Part Number, Date Invoice, Date Actual, Qty, Created At, Created By, Inbound, Big Box, Update Arrival Date, Putaway Slip, Delete, and Send. The table contains 10 rows of data, each representing an invoice entry.

Umara is one of the largest food and beverage industry in Indonesia. Umara is growing their products up through modern business platform. They intended to put their business into website and mobile apps commerce called Laukita.

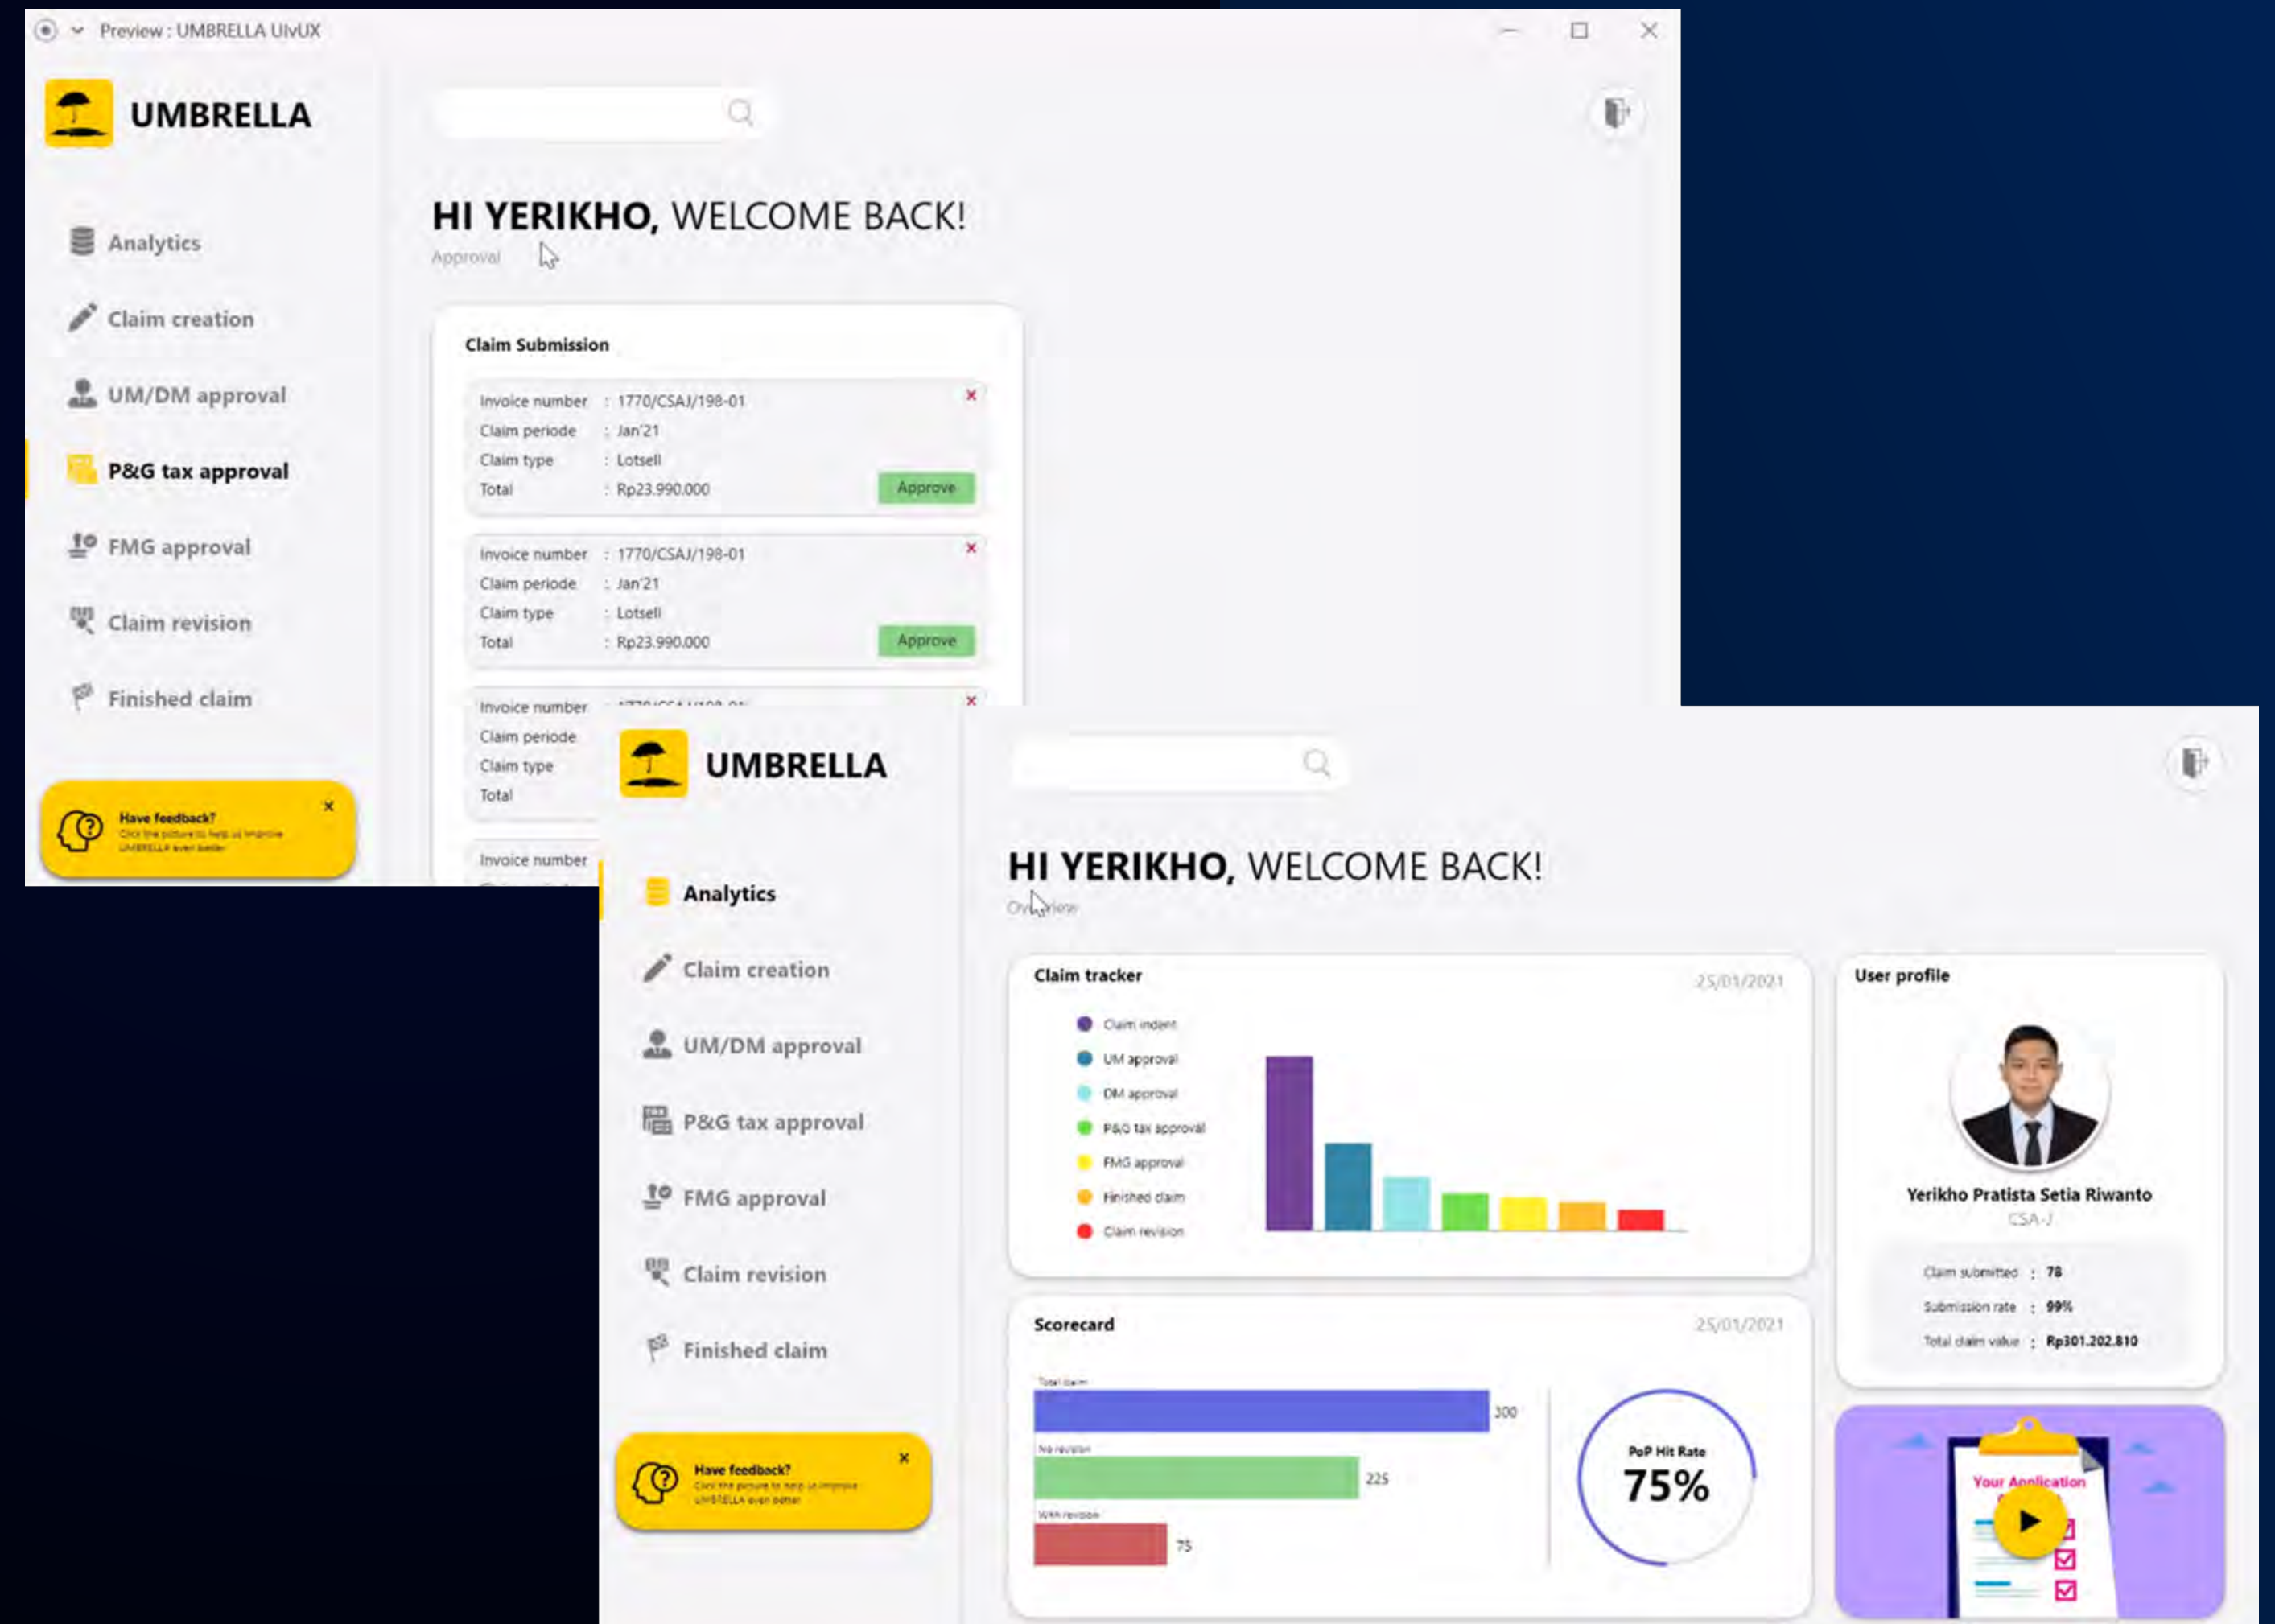

PROJECTS

P&G INDONESIA

Claim Management System is built to automate their claim process and activities to be easier, faster, and paperless

P&G

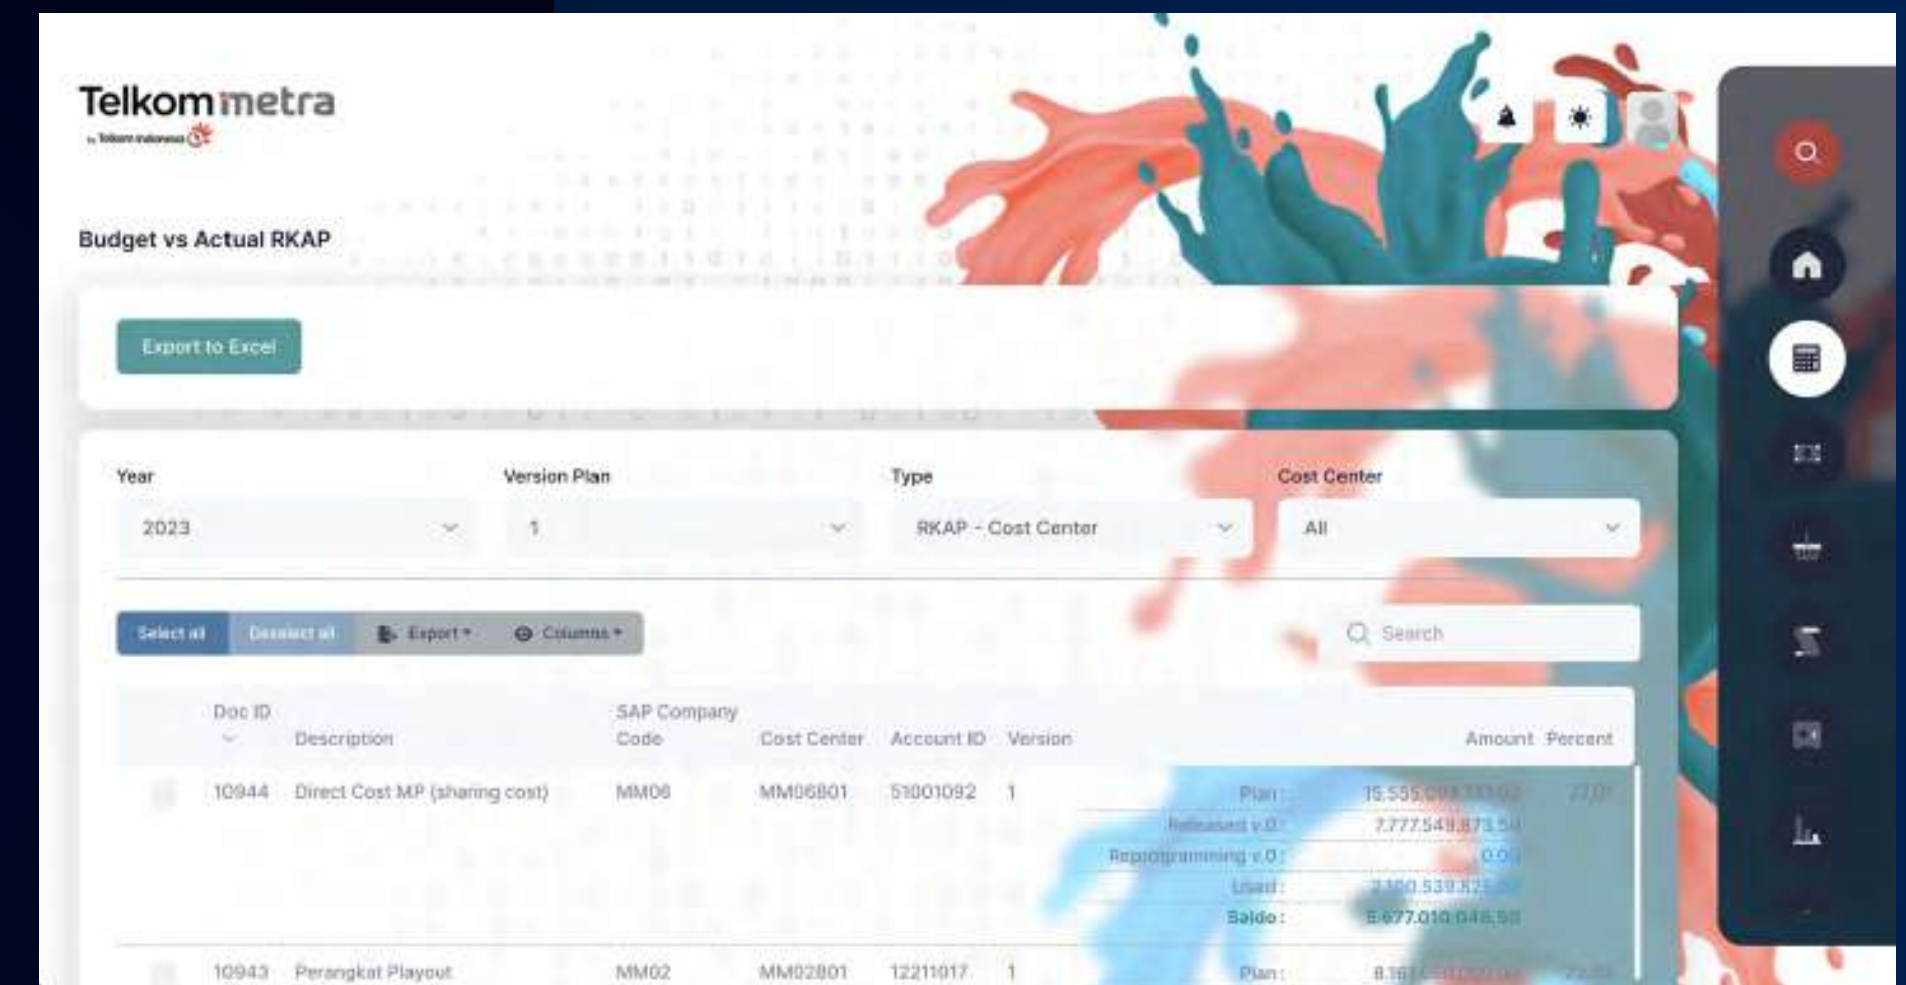

Telkom Metra - MSIS

MSIS was built as customized enterprise resource planning and maximizing workflow efficient as possible. Major modules like Cash Management, Procurement, Budgeting, Billing, and Accounting are the core functionalities of this system. We created this software using open-source framework from Laravel, Oracle Community for database, Ubuntu for operating system, and so much more. From open-source framework, we can build enterprise level software as good as business solutions software.

A screenshot of the "User Login" form. It features a dark teal background with a semi-transparent white box containing the login fields. The fields include "NIK" and "Password" (with a toggle for visibility), a "Remember me" checkbox, and a "Login" button. The background also shows a stylized red hand holding a white circle.

PROJECTS

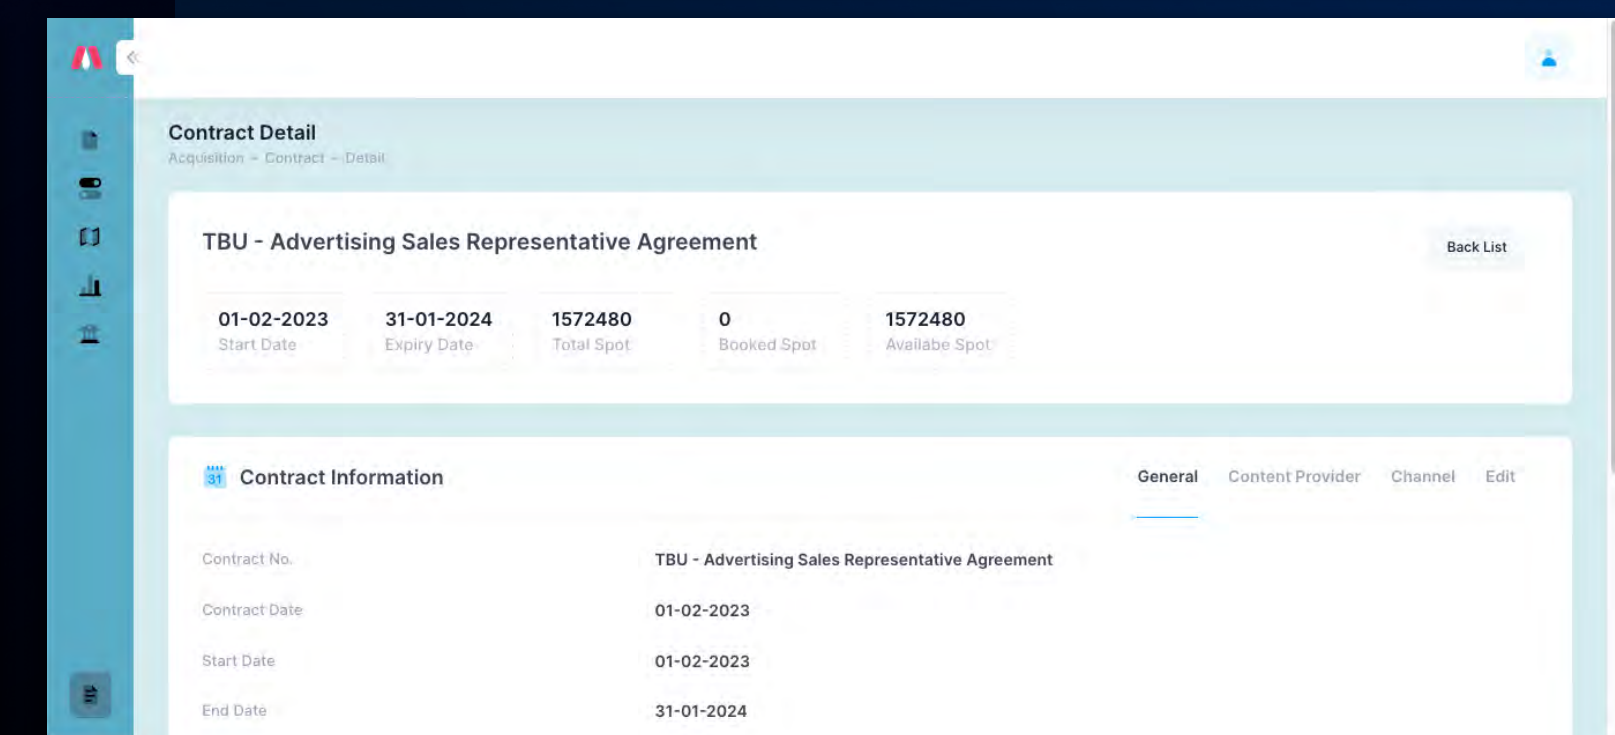

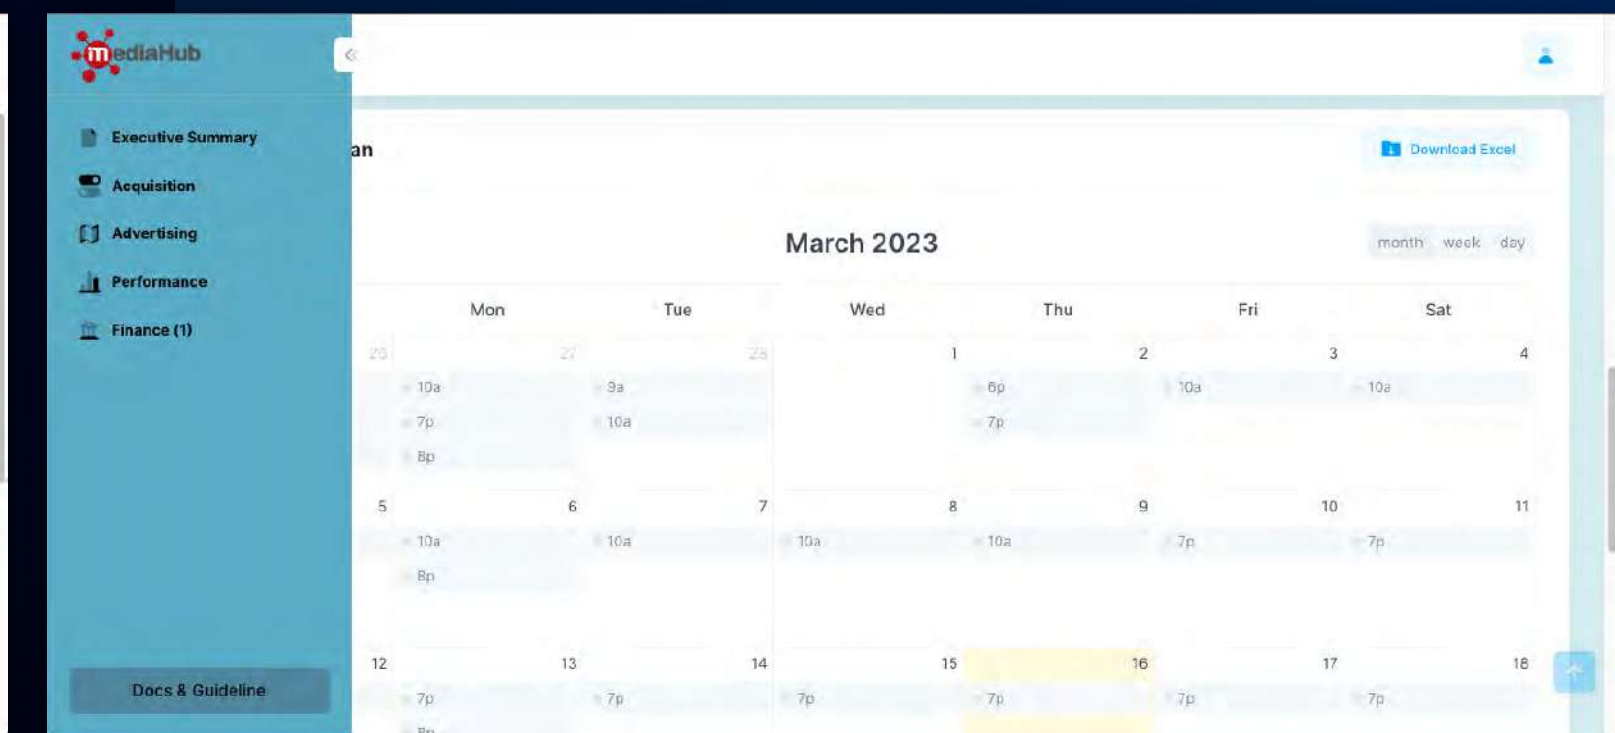

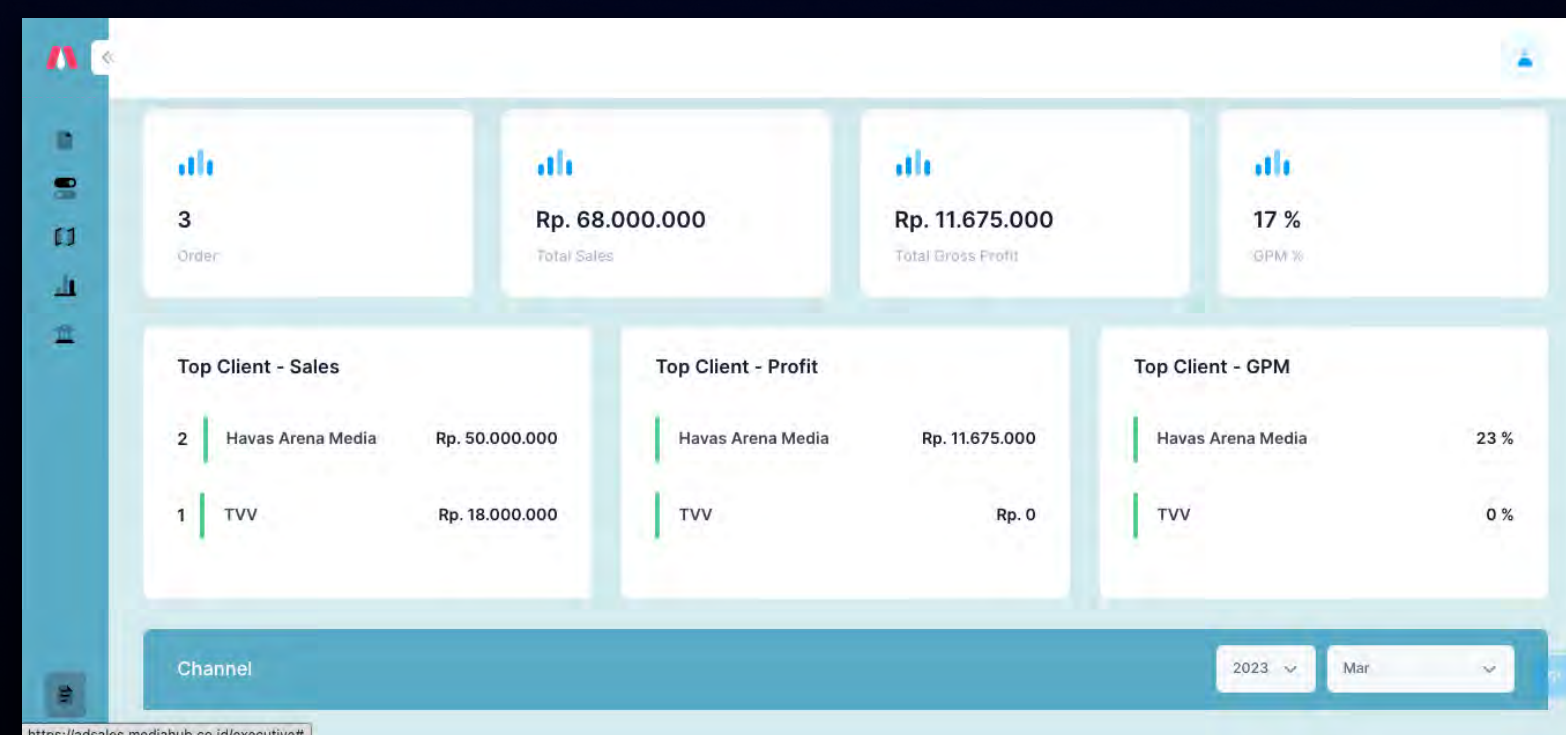

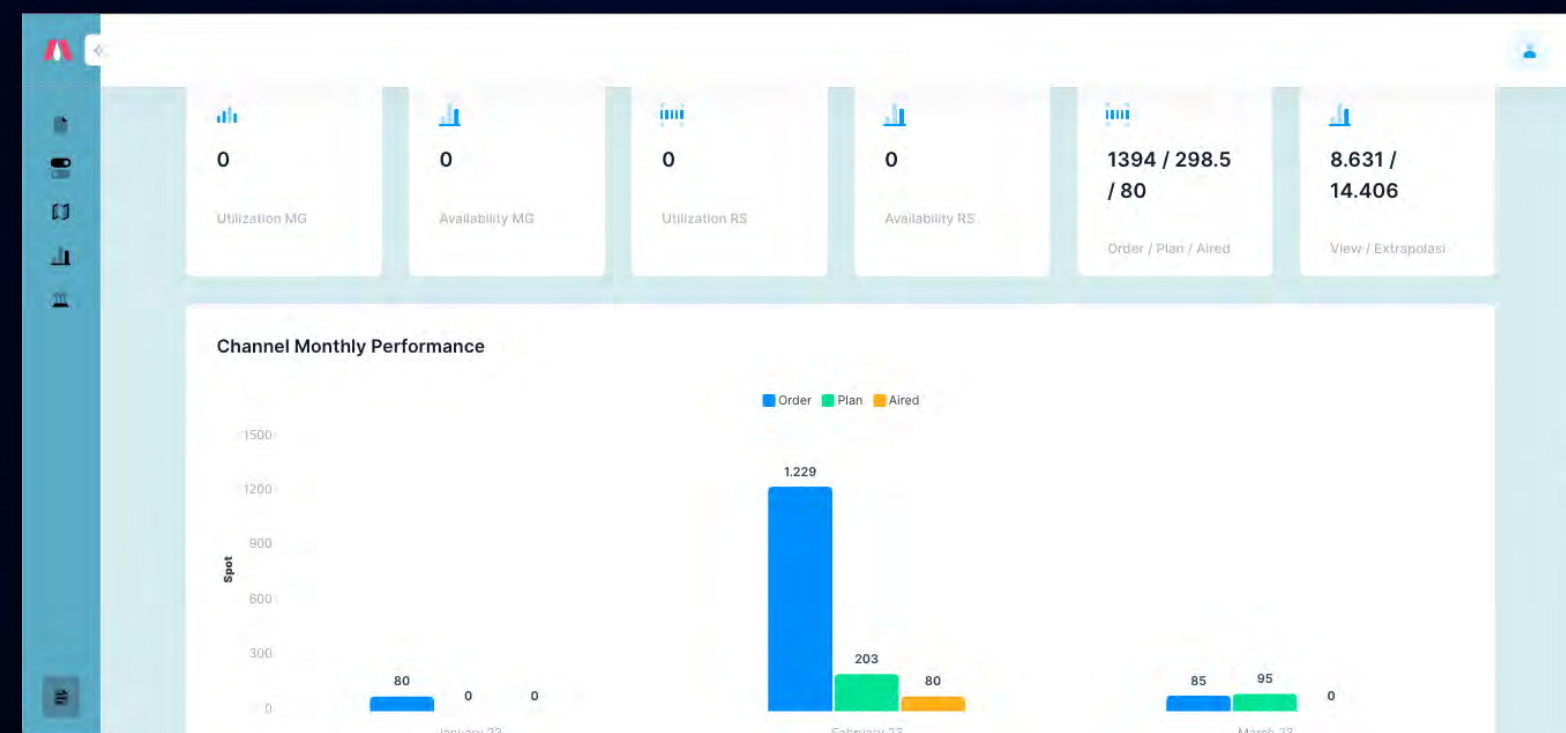

Telkom Metra - Ad Media Hub

Maintaining screentime for TV commercial is hectic job to keep the schedule tight but accurate. To solve this problem, we created a software for Ad Media Hub from Telkom Metra to buy screentime credits, scheduling calendar, invoicing, and so many features. From this software, Ad Media Hub team will no longer having a hardtime to monitor and book the screentime.

Telkom
Indonesia

the world in your hand

PROJECTS

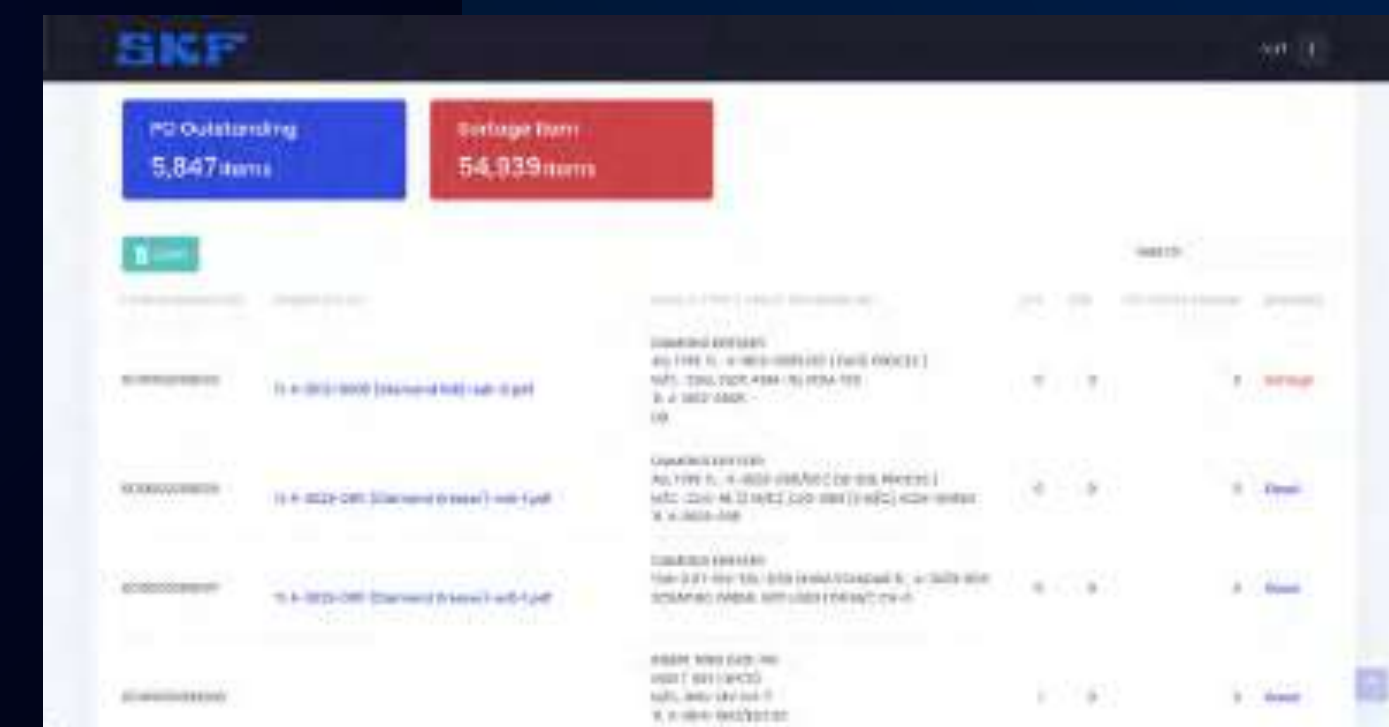

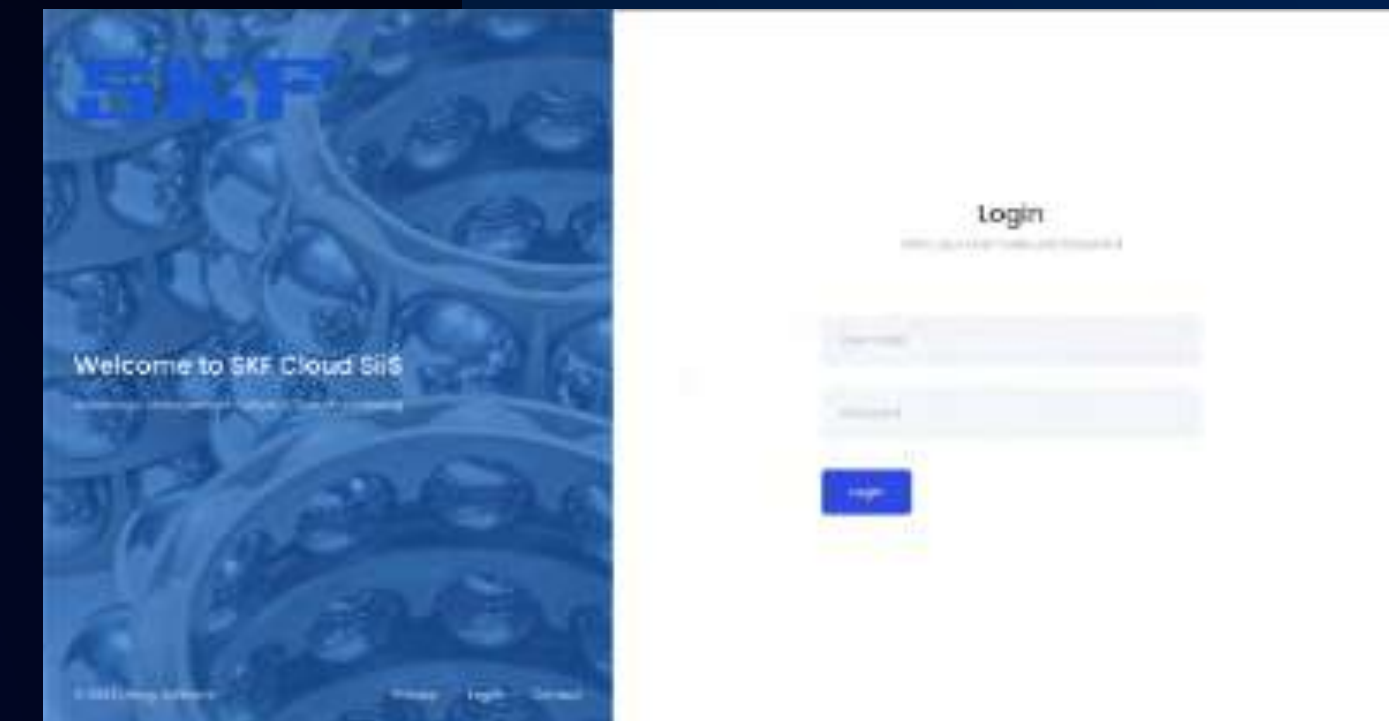

SKF - WMS & Monitoring

Small scale enterprise resource planning software to manage supply chain, estimate and manage inventory strategically. The system was made to be open for suppliers to access informations such as pending invoices and purchase order. Sales team also can access real-time informations of supplies movement, sales, and prospects leads. With this capabilities, team will have a rapid flow of informations and let the management to decide what is best for the business.

SKF

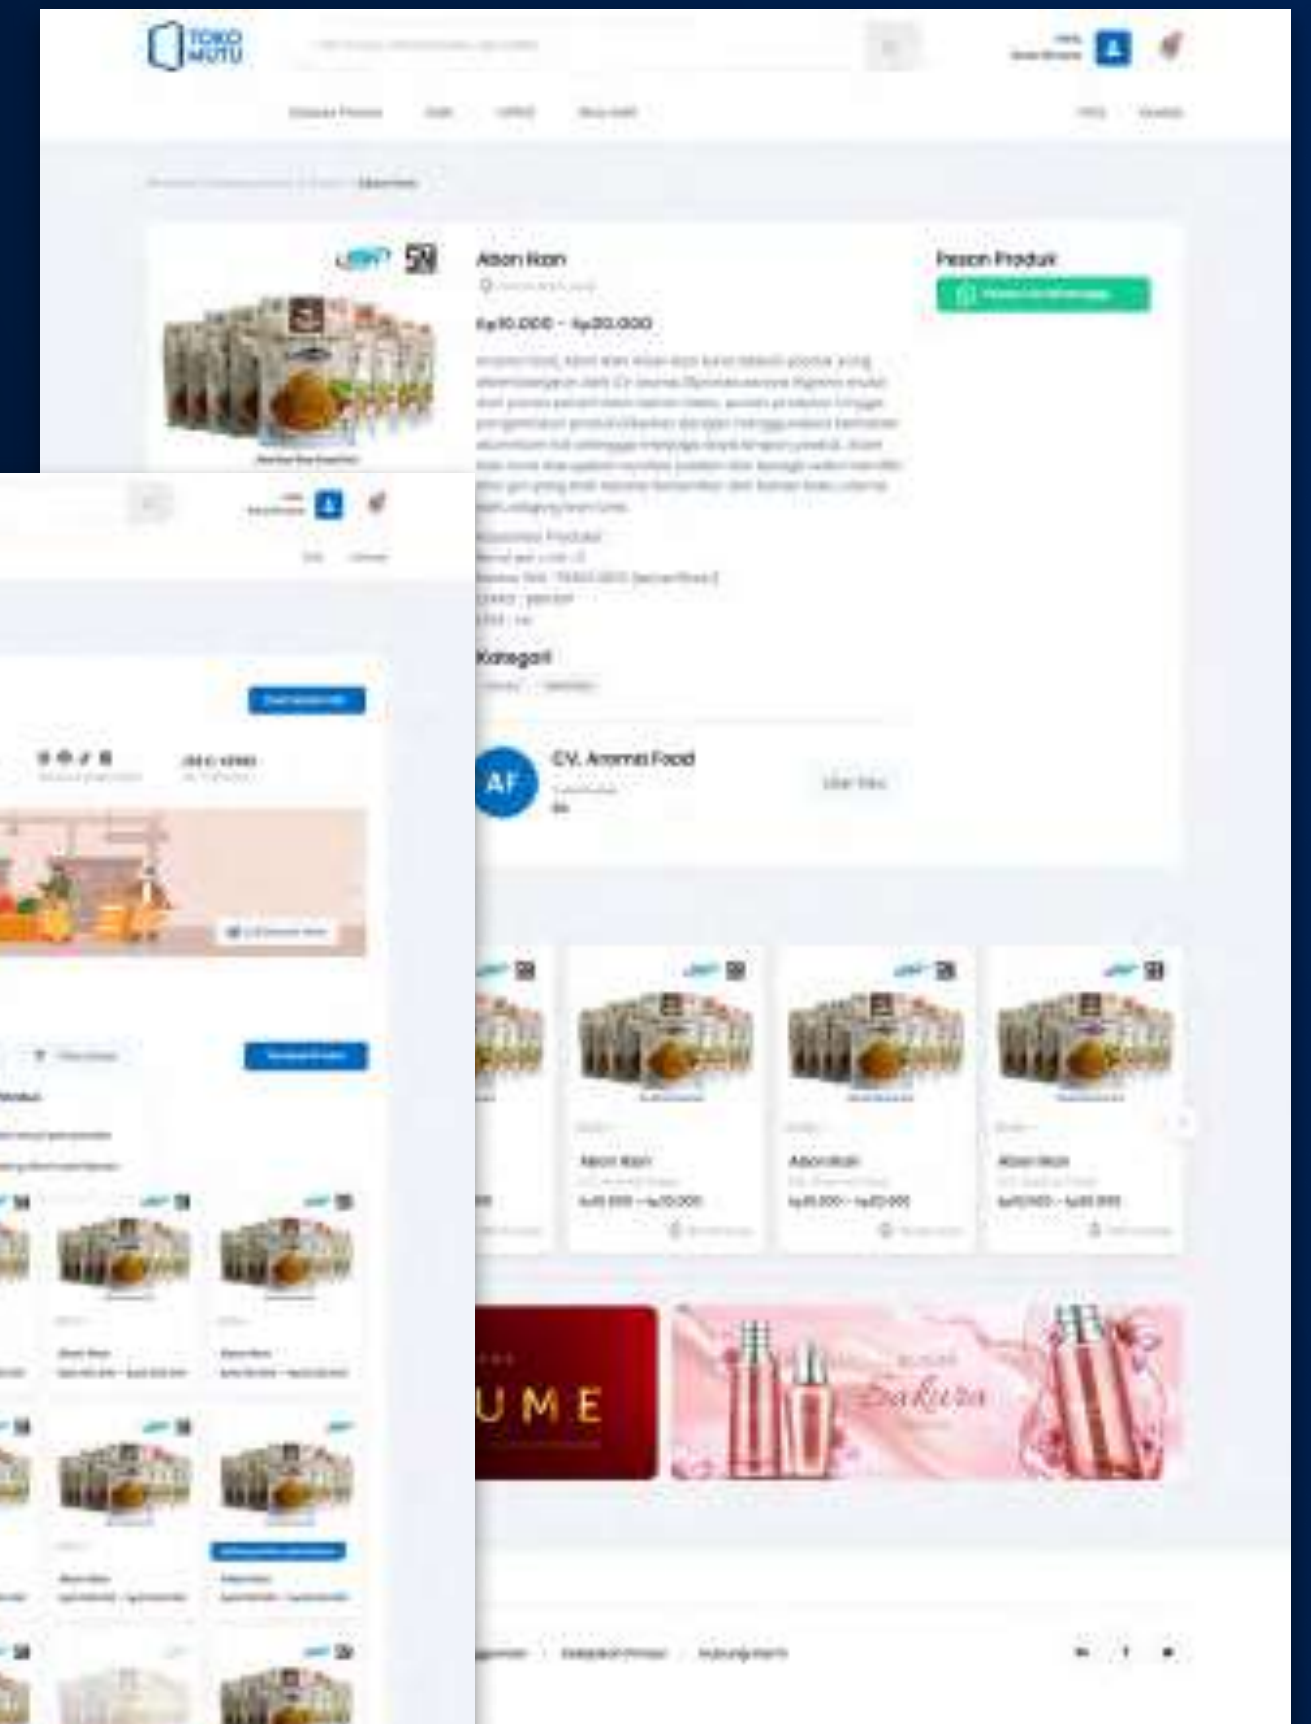

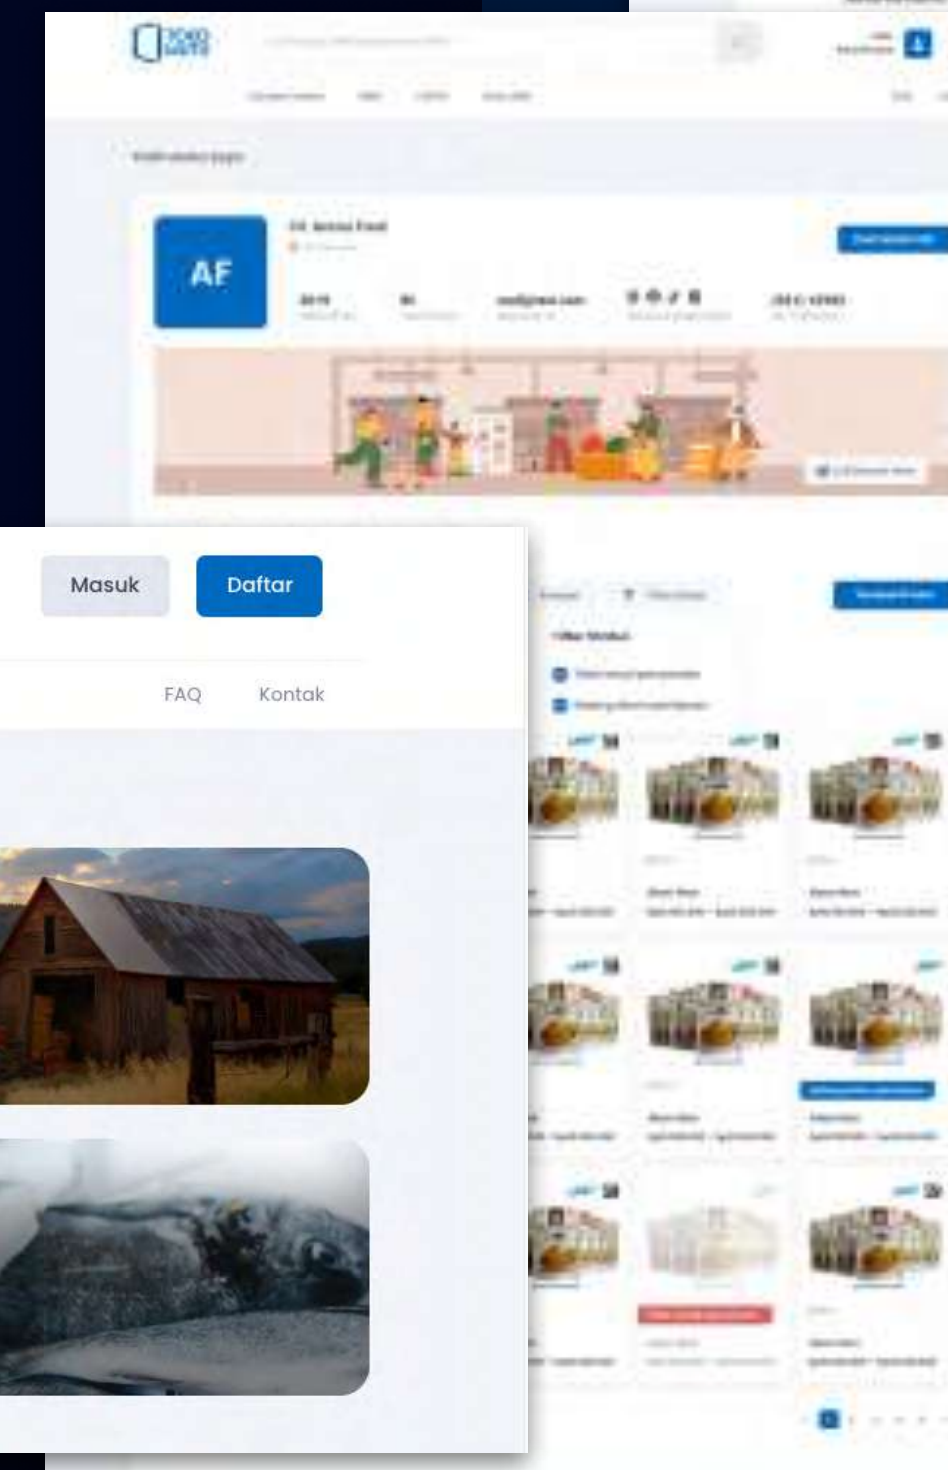

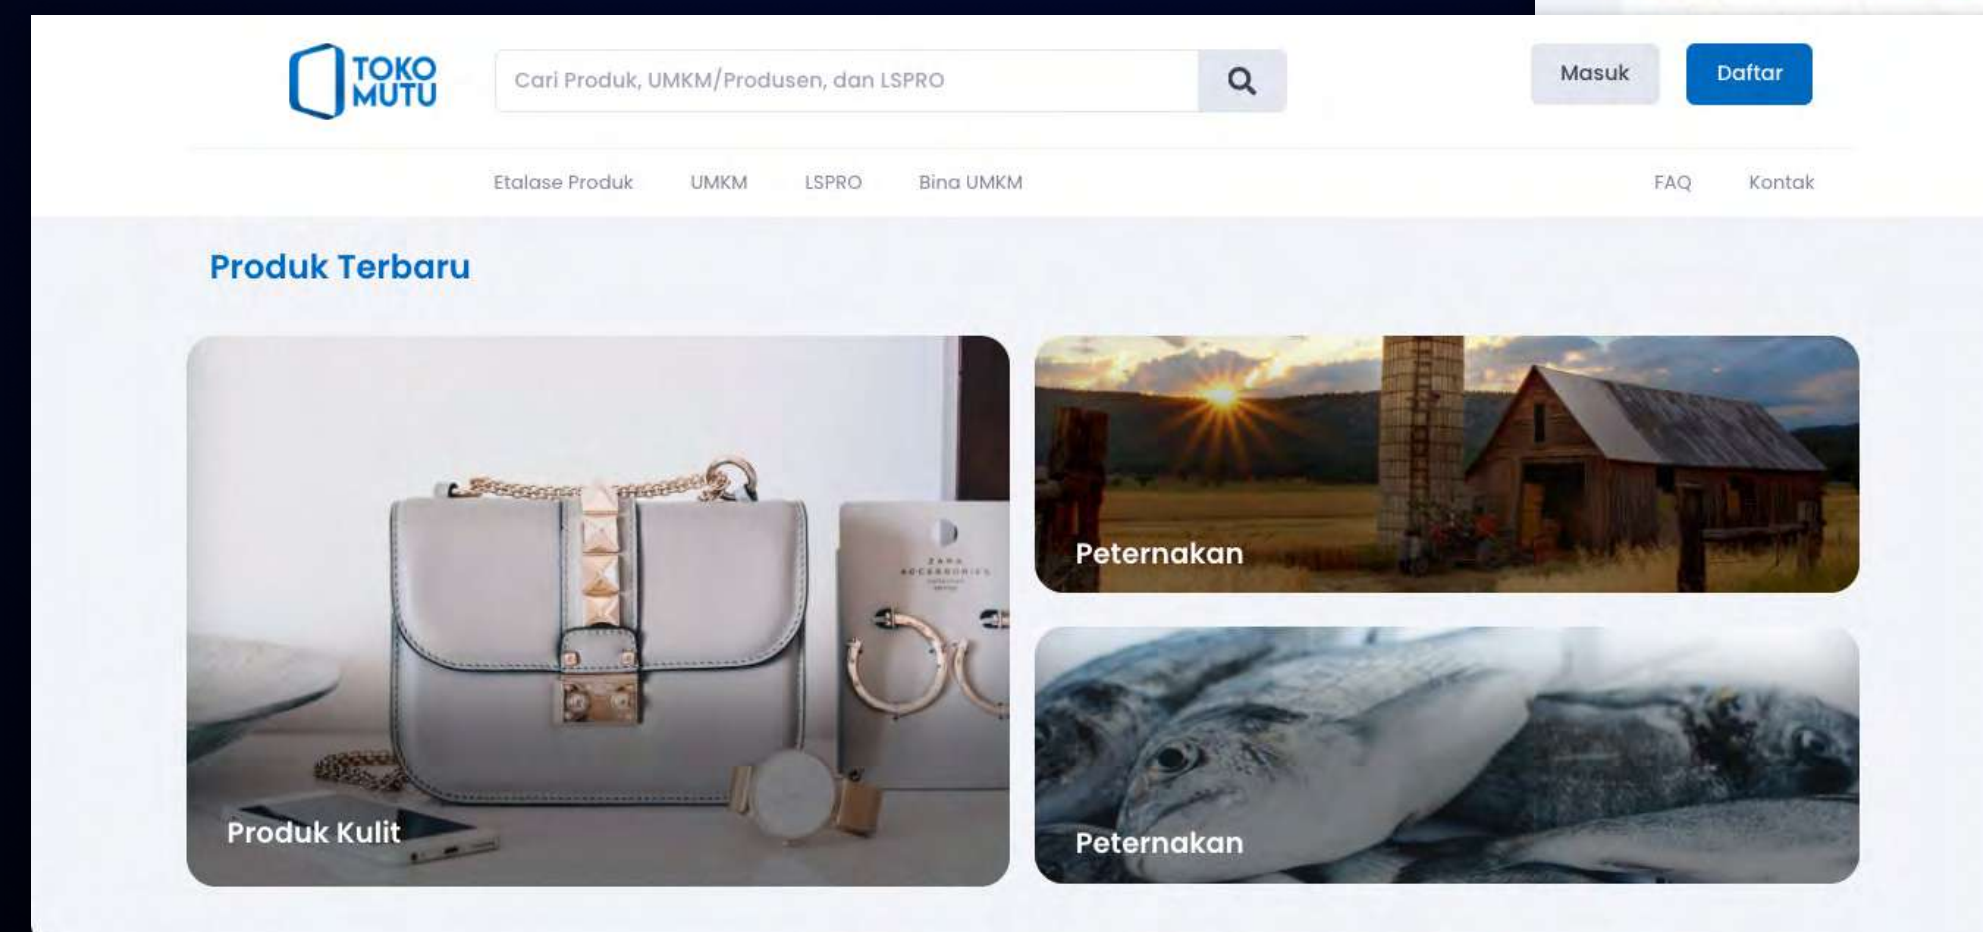

PROJECTS

Badan Sandi Negara - Tokomutu

Every products on the market need to have a legal registration codes to make sure the product is valid and legal. The software we made, will ease product owners or principles to get registration codes online. We designed it as an e-commerce, so visitors who interested with the products can have an inquiries with the distributor or principles.
